

# What's New in SmarTerm v11?

Welcome to SmarTerm v11. This document briefly describes the new features in this version of SmarTerm, and provides information to help you upgrade your installation of SmarTerm. As always, further information is available in the online and printed documentation that came with SmarTerm, as well as the online help and Release Notes. Esker also provides technical support through its website ([www.esker.com](http://www.esker.com)). For contact information within SmarTerm, select Help>Technical Support.

## Enhanced security features

SmarTerm v11 addresses the growing demand for secure connections by expanding its suite of security tools. This version includes Secure Copy (SCP). SCP provides a new level of protection for file transfers.

### SCP

SmarTerm v11 now features Secure Copy (SCP) between PCs and hosts that support it. SCP allows the copying of files and folders to and from a host machine that supports SSH. SCP uses SSH as a security protocol to allow for secure file transfer. SSH has gained increasing support as a secure method of communication. With SSH, neither usernames nor passwords are transferred over the network in such a way that they can be caught and used later. SCP is a standard tool designed for file transfer work over SSH.

## Accelerator Keys

SmarTerm v11 incorporates Accelerator Keys to allow for keyboard access to various functions to comply with Section 508 requirements. SmarTerm follows the Microsoft Office and Windows 95/NT accelerator key assignments, except where the host is likely to misinterpret the keystrokes; then SmarTerm just adds a Shift in front of the Windows Ctrl key where necessary. If your application doesn't rely on the terminal meanings of these Ctrl key combinations, you can choose to use the Windows accelerator keys throughout. Just select Properties>Emulation> Keyboard tab, and in the Function, Alt and Ctrl Keys Act As box mark Windows keys

## What's New in SmarTerm v11?

---

### All emulations.

Key	Equivalent Menu Function
Alt+B	SmarTerm Buttons
Alt+C	Connection menu
Alt+D	Tools>FTP Drag and Drop
Alt+E	Edit menu
Alt+F	File menu
Alt+G	Tools>Receive Files (using current non-FTP protocol)
Alt+H	Help menu
Alt+I	Edit>Paste from File
Alt+K	View>Terminal Keyboard
Alt+N	Connection>Properties
Alt+O	HotSpots
Alt+P	Properties menu
Alt+R	Tools>Macros
Alt+S	Tools>Send Files (using current non-FTP protocol)
Alt+T	Tools menu
Alt+V	View menu
Alt+W	Window menu
Alt+Y	Tools>FTP or Kermit Command Mode
Alt+Z	Edit>Clear Screen
Ctrl+Shift+T	Triggers
Ctrl+Shift+H	Shortcut bar

If you choose Windows Keys, even remapping with the Keyboard Map Editor doesn't override the Windows/ Office function of the accelerators. The Ctrl key form of the accelerators appears on the menu, but both the Ctrl and Ctrl+Shift forms continue to work as accelerators.

## DG Dasher, Digital VT, ANSI, SCO ANSI, and WYSE emulations

Windows Key	Terminal Key	Equivalent Menu Function
Ctrl+A	Ctrl+Shift+A	Edit>Select Screen
Ctrl+C	Ctrl+Shift+C	Edit>Copy
Ctrl+N	Ctrl+Shift+N	File>New
Ctrl+O	Ctrl+Shift+O	File>Open
Ctrl+P	Ctrl+Shift+P	File>Print
Ctrl+S	Ctrl+Shift+S	File>Save
Ctrl+V	Ctrl+Shift+V	Edit>Paste

## IBM emulations

Windows Key	Equivalent Menu Function
Ctrl+A	Edit>Select Screen
Ctrl+C	Edit>Copy
Ctrl+N	File>New
Ctrl+O	File>Open
Ctrl+P	File>Print
Ctrl+S	File>Save
Ctrl+V	Edit>Paste
Ctrl+X	Edit>Cut

## Esker Technical Support

Esker now offers technical support from countries throughout the world. Technical support is available Monday through Friday (see *Getting Started* for exact times in your area), while technical articles, patches, and other support information is available 24 hours a day at the Esker website [www.esker.com](http://www.esker.com).
